Top 10 issuers represent 20.09% of the portfolio.

Objective and strategy

- MMG Fixed Income Fund is a diversified, fixed-income and hybrid capital, US-dollar-denominated fund that invests in securities whose country of risk is in Latin America and the Caribbean.
- The fund's objective is to obtain a superior net return to traditional short-term banking products and to pay a monthly dividend.
- Our investment process focuses on the fund's total return, while maintaining a low-volatility profile. We established investment guidelines that allow us to maintain a diversified portfolio and minimize credit and interest rate risk.
- Given Panama's stable and international capital markets and our expertise in the local economy, we placed the country at the core of our investment process. Although we favor a bottom-up approach, we monitor macroeconomic conditions of all the countries/sectors we operate in and position the portfolio accordingly.

Disclaimer

Important risks:

The fund is actively managed and its characteristics can vary. The fixed income securities in which the fund invests can vary in price depending on the market conditions. Among the risks of fixed income investments there exists the risk of an increase in interest rates and credit risk. Normally, when interest rates increase, the price in fixed income securities proportionally decreases. On the other hand, credit risk refers to the possibility that the bond Issuer is not able to pay the interest or initial investment creating a financial loss to the fund and consequently to the investor. Although the fund only invests in fixed income securities that are issued in US dollars, international investments imply specific risks, including but not limited to monetary fluctuations, lack of liquidity, and volatility of the investment. These types of risks are present on emerging markets investments. High Yield Bonds are more prone to fluctuations in price and the risk of the issuer not being able to repay the debt. The interested investors should consult the informative prospectus that is available in the offices of MMG Bank Corporation. This factsheet does not represent an investment recommendation in the fund.

Other:

- 1) Regulated by the Securities Market Superintendency of Panama. Licensed to act as Investment Manager.
- 2) Regulated and supervised by the Superintendency of Banks of Panama and the Securities and Exchange Commission of Panama. Licensed to act as Brokerage House.
- 3) The Board of Directors has approved redemptions on days 1, 9, 17 y 25 of every month, nonetheless the Board reserves the right to suspend redemptions at discretion and might do so in the event of market stress.
- 4) Ongoing Charges include expenses incurred for the fund's operation and are deducted from the assets of the fund over the period. It includes fees paid for investment management, custodian fees, and applicable taxes. The management fee is 1% and subject to a 7% sales tax.
- 5) Past performance is no guarantee of future results. The risks inherent in investing in the fund are detailed in the offering memorandum and prospectus. Annual returns are shown in USD, net of fees, and as of 31st December. Total return includes both changes in share price and distribution payments.
- 6) Calculated using average rate published by the Panamanian Banking Superintendency for the given period.
- 7) The fund may invest in developed markets for liquidity management.
- 8) For entity concentration, we consider the issuer for equity securities and the ultimate obligor for credit securities.
- 9) Weighted duration refers to the sum of all fixed-income instrument's duration multiplied by its weight in the portfolio. Duration refers to the sensitivity of a debt instrument's price to a change in interest rates.
- 10) Weighted maturity refers to the sum of all fixed-income instrument's time left to maturity in years multiplied by its weight in the portfolio.
