**Important risks:** The fund is actively managed and its characteristics can vary. The fixed income and equity securities in which the fund invests can vary in price depending on the market conditions. Among the risks of fixed income investments there is interest rates and credit risk. Credit risk involves the possibility that an issuer will not conform to its financial obligations. Fixed income securities are also sensitive to market interest rates. Equity risks are related to significant changes in the future ability of a company to continue its business transforming into permanent changes to the present value of the company's equity value. Also, economic conditions can limit the company's ability to generate free cash flow for the shareholders and its ability to pay dividends. The fund can also invest a percentage of its portfolio in instruments outside a regulated market which can
